|---|---|---|---|

## Position Summary

RIS seeks enthusiastic and engaging MS Math and Science Teacher who is responsible, in collaboration with the grade level team, for creating a vibrant, student-centered environment that supports the learning and personal growth of each student. He or she must be skillful in establishing a strong relationship with students and creating learning opportunities that motivate and inspire students to develop all aspects of their potential. He/she should be able to apply best practices in an inquiry-based approach, differentiation, assessing student learning and standard-based assessment, grading and reporting. Additionally, he/she should be well-versed in curriculum designs and unit development, using backward planning, as well as a commitment to developing mathematical, science and literacy skills and integrating digital citizenship into the one to one laptop environment

## Qualifications and Attributes

- A Master's Degree in related fields preferred
- Current Math certification (additional science certification preferred)
- Training and experience in teaching math and science to MS students of diverse backgrounds and abilities preferred.
- Minimum of two years of successful teaching experience in a K-12 school setting
